

Interholco:  
Impact, Trust, Quality

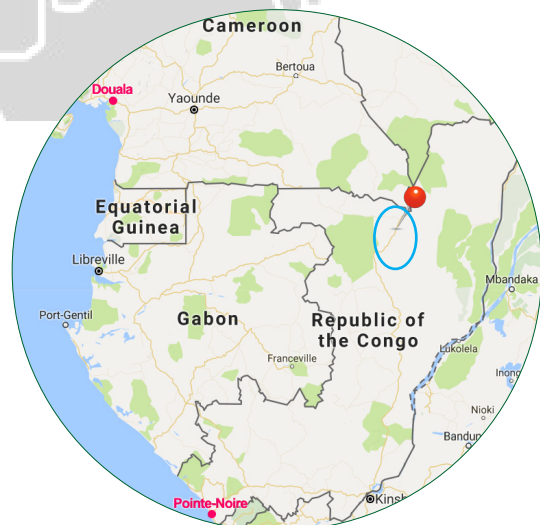

Interholco:  
Impact, Trust, Quality

# Our products drive development

Since 1962, the products that you have bought from Interholco drove growth and development in some of the least developed parts of the planet. These products continue to give value to the people who live off the 1,1 million hectares of forests in the Republic of Congo that Interholco's subsidiary IFO manages for future generations. Having Interholco as your preferred supplier, you contribute to creating jobs for thousands of people in Africa.

We do  
more than wood

Systematically developing skills of people in Africa, our quality facilities attract local talent, creating economic development in a disenfranchised area. In addition to a competitive salary, employees have access to multiple benefits, including health care, electricity and family homes, thus increasing family investment in the development and health of future generations.

## Motivation and know-how products that you can trust

**W**e communicate directly: with you as a customer and with our production management in remote areas of Africa. Knowing your requirements, we translate them into cutting bills and break-down optimization by translating your product specifications into the best and most responsible use of the available raw material. Our investment in modern equipment, but more importantly in the skills of our local employees ensures that you get what you need for the success of your business.

**O**ur high compliance standards exceed international requirements.

# Our products are wonders of nature

**S**ustainability is what we do: mindful to preserve forests for future generations, we harvest, on average, 1 tree in the equivalent of 3 football fields every 30 years - a fraction of extraction compared to Northern Hemisphere and far remote from plantation standards.

**A**t the same time, our investment in wild-life preservation continues to protect the habitat of large mammals.

**S**o, too, the wood products themselves stem climate change: sequestering carbon from the atmosphere.

# A log collection measuring up to your needs

**A**frican wood products - from doors to furniture to flooring to outside applications - with their functionality, natural expression, scent, colour and durability, they infuse well-being and state-of-the-art design with mankind's most versatile material.

**Q**uality consistency in Interholco log grading ensures a consistent supply, minimizes risk of undesirable wood characteristics, thereby reducing further processing cost.

# High-performing products and higher yields

**W**ood properties can be enhanced by technology. Interholco offers engineered wood products to extend the properties and usefulness of wood products for demanding applications, thereby enhancing your options to use African species. Doing so, together we increase local employment, extend the carbon-cycle of the wood, and produce durable products for your exterior and interior project endeavours.

Rosewood Hotel, Abu Dhabi/United Arab Emirates (next page)

**D**o you have an interior or exterior project in mind? Any residential, shop-fitting or hospitality idea?

**A**frican hardwoods are better by nature when applied skillfully: resisting fungal decay, insect attack, and other deteriorating effects by the virtue of their properties without further treatment. Talk to Interholco about applications that promote the technical performance and aesthetic beauty of Interholco wood.

A touch of the naturally  
extraordinary

Royal Opera House, Muscat/Oman (top and left)
